EXPERIENCE

Software Engineer

Veefin Solutions LTD

May 2022 – Continuing E-Block, Banasree, Dhaka, Bangladesh

- Plan and execute full software development life cycles (SDLC) for each assigned project, adhering to company standards and expectations.
- Examine existing systems, identifying flaws and creating solutions to improve service uptime and time-to-resolve through monitoring and automated remediation.
- Create scalable software platforms and applications, and efficient networking solutions that are unit tested, code reviewed, and checked regularly for continuous integration.
- Visualize, design, and develop creative and innovative software platforms, as we continue to experience dramatic growth in the usage and visibility of our products.
- Grow existing platform and network capabilities to handle massive growth, enabling the generation of insights and data products on all internal and external data via self-serve computing, reporting solutions, and interactive querying.
